

Sustainability

OVERVIEW 05/2023

About us

We are Print Tattoo, a brand of the company Stainer. Our goal is to turn temporary tattoos into a medium that is fun and conveys important messages in a playful way. We focus on the professional use of tattoos for businesses, so our products are designed specifically for designers and marketers. Easy data creation, a simple ordering process, inexpensive large print runs and professional customer support are what make Print Tattoo stand out. Print Tattoos are designed to be fun for our customers and for the environment. That's why our products are regularly tested by independent testing institutes for their skin compatibility and meet extensive environmental standards. Sustainability is a holistic approach for us. It starts with the use of green electricity in our production in Austria and goes all the way to the recycling of our products.

SUSTAINABILITY ALONG THE PRODUCTION PROCESS

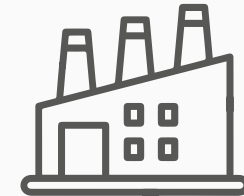

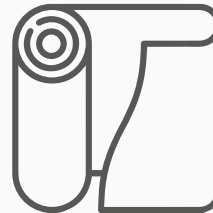

Vegan ingredients

Print Tattoos are made exclusively from vegan ingredients. This means that none of the ingredients used are of animal origin. This was confirmed by an assessment of the TÜV-Rheinland.

Made in Austria

Print Tattoos are 100% made in Salzburg/Austria.

RAW MATERIAL

Selection of suppliers

All our raw materials are exclusively sourced from European distributors.

PRODUCTION

Green electricity in the production facilities

In our production halls, all machines are powered by 100% green electricity from our own photovoltaic system. Our vehicle fleet also consists mainly of electric vehicles charged with green electricity.

Short transport routes

The entire production of Print Tattoo takes place in Salzburg/Austria.

SUSTAINABILITY ALONG THE PRODUCTION PROCESS

SHIPPING

Sustainable packaging design

Print Tattoos packaging is constantly optimized to further improve environmental sustainability. Our packaging is plastic-free to the greatest extent possible and can thus be easily recycled. With special paper bundling, paper packing tapes, cardboard wrapping and recycled filler material, we implement this concept down to the smallest detail.

USAGE

Application and safety instructions

On each tattoo the application and safety instructions as well as a list of all ingredients are printed. Consumers can thus obtain detailed information about the product before using it. The entry of the products in the CPNP database assures users that it is a tested cosmetic product.

RECYCLING

No plastic waste

All Print Tattoos have a paper cover as standard. So there is no plastic waste left after proper use of the tattoo.
